Risk, mean error and a strict tail

Grades (1, 2, 2, 3): six original pairs, five issued comparisons.
The protected scope contains three comparisons involving unit 1.

Targets	Mass	F	F > 1?
(4,3,2,1)	4/5	0	No
(3,4,2,1)	3/20	1	No
(2,4,3,1)	**1/20**	**2**	**Yes**

F counts scoped errors. At t = 1/3, strict exceedance starts at F = 2.

Reporting risk
(1/4 + 1/4) / 6 = 1/12

Mean scoped error fraction
(1/4) / 3 = 1/12

Joint tail probability
J = 1/20; cap = 1/20: passes

The equal values 1/12 are coincidental. P(any false assertion) = 1/5.
