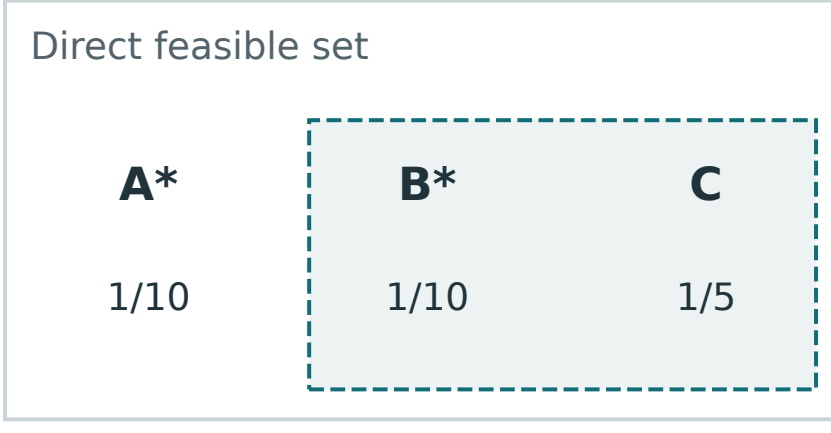
Every direct minimizer matters

Illustrative finite decision sets.
A and B tie for the direct minimum.
Numbers are risks, not probabilities of actions.

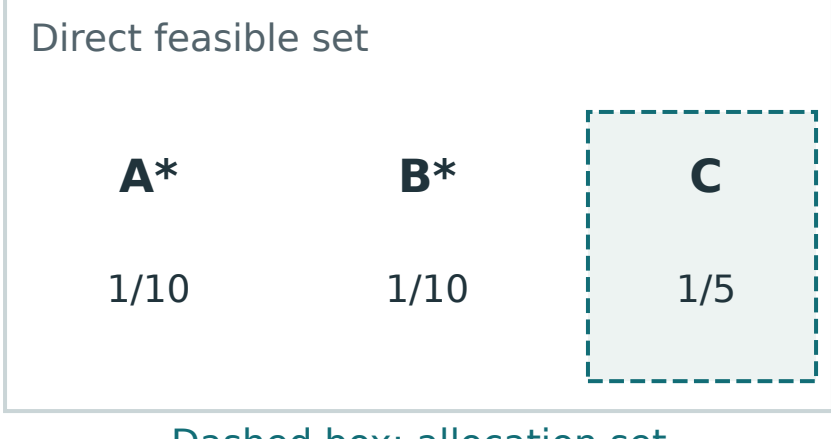
One minimizer remains



Dashed box: allocation set

Direct minimum = 1/10
Allocation minimum = 1/10

Every minimizer excluded



Dashed box: allocation set

Direct minimum = 1/10
Allocation minimum = 1/5

* marks every direct minimizer.
Each panel holds its objective fixed.
These are set illustrations, not profile data.
