Same joint law in both panels

Crossed priorities (4/5); both reverse (1/5).

(a) Best common card

W / W: identical columns

Unit	Domain 1	Domain 2
Alder	1	1
Birch	1	1

Both comparisons withheld

Same grade does not assert equality.

Risk = 1/3 **Joint error J = 0**

(b) Best profile card

AB / BA: crossed columns

Unit	Domain 1	Domain 2
Alder	1	2
Birch	2	1

Domain 1: Alder leads

Domain 2: Birch leads

Risk = 1/5 **Joint error J = 1/5**

Both cards satisfy J <= 1/4.

J: chance of any false issued direction.

Smaller grade = higher reported priority.

Fixed settings are given in the chapter.
