Same joint law for both reporting formats

Probability 4/5: Alder leads in Domain 1; Birch leads in Domain 2.

Probability 1/5: both directions reverse.

(a) Best common card

Identical columns: W / W

Unit	Domain 1	Domain 2
Alder	**1**	**1**
Birch	**1**	**1**

Both comparisons withheld

Same grade does not assert equality

Risk = 1/3 **Joint error J = 0**

(b) Best profile card

Crossed columns: AB / BA

Unit	Domain 1	Domain 2
Alder	**1**	**2**
Birch	**2**	**1**

Domain 1: Alder leads

Domain 2: Birch leads

Risk = 1/5 **Joint error J = 1/5**

Smaller grade = higher reported priority.

Cap = 1/4; threshold t = 0; withholding cost = 1/3; domain weights = 1/2, 1/2.
