A full-profile guard keeps the original comparisons

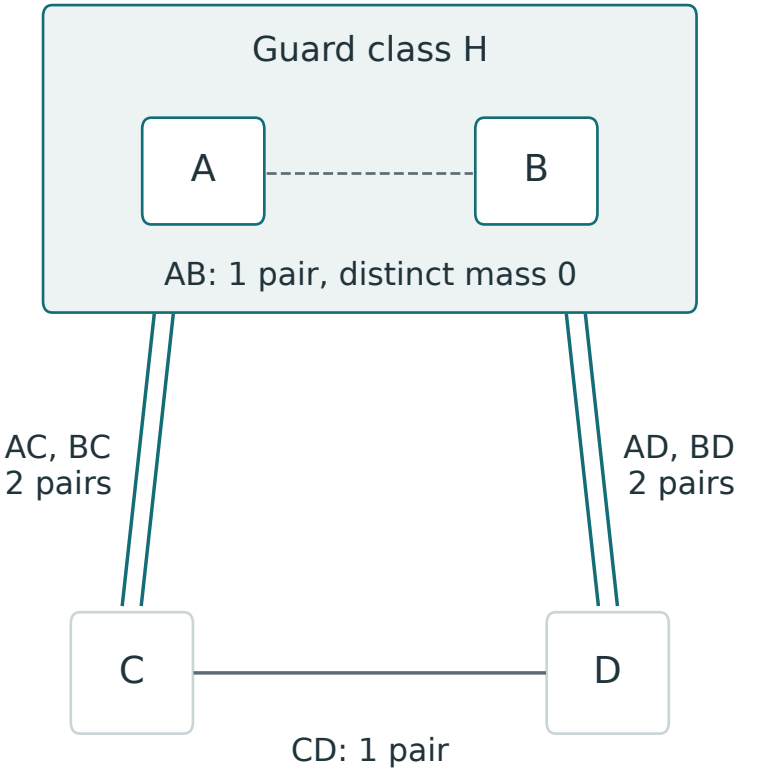
Complete two-state law; both criteria active with w = (1/4, 3/4)

Complete profiles under the stipulated law

	State 1: mass 3/5		State 2: mass 2/5	
	Criterion 1	Criterion 2	Criterion 1	Criterion 2
A	0	0	0	0
B	0	0	0	0
C	2	0	2	0
D	3	1	1	1

A and B: full active-profile match.
A and C: criterion 2 only; no required guard.

Retain the original pair frame



1 + 2 + 2 + 1 = 6 original pairs

Guard: gA = gB; other reported ties remain permissible.
Preserves existence of a weighted neutral-risk minimizer in the full at-most-G family.
No extra restrictions; original M = 6. This is not an arbitrary merging rule.
