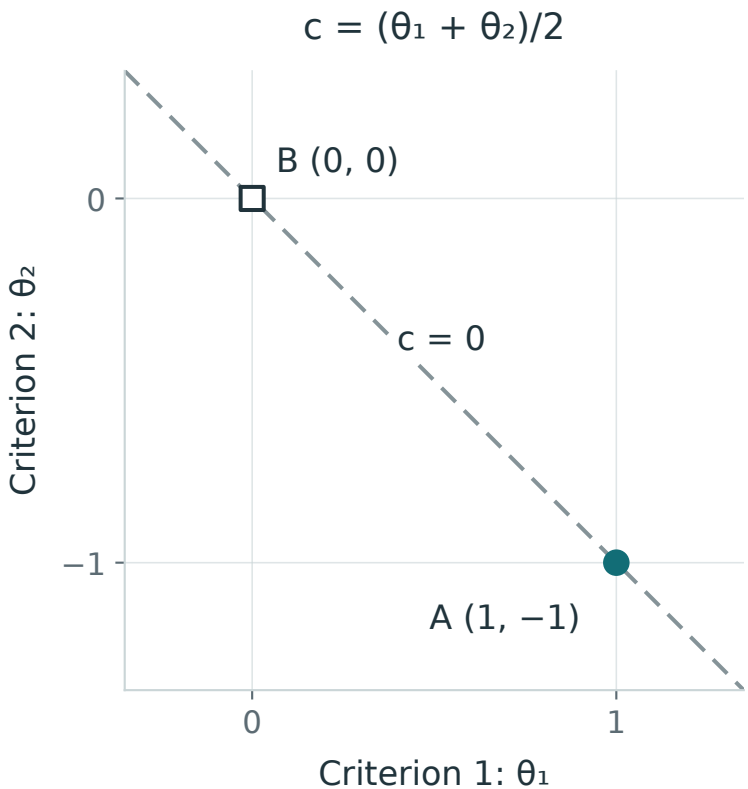
Composite equality, criterion opposition

Known point-mass targets; no estimation uncertainty.



Weak-error loss

Report	Composite	Criteria
A>B	1	1/2
Hold	**τ**	**τ**
B>A	1	1/2

Equality-neutral loss

Report	Composite	Criteria
A>B	0	1/2
Hold	**0**	**τ**
B>A	0	1/2

a = w = (1/2, 1/2); M = 1; 0 < τ ≤ 1/2.

Hold row: weak τ versus τ; neutral 0 versus τ.

Zero neutral composite cost does not establish strict superiority or a substantively preferred target.
