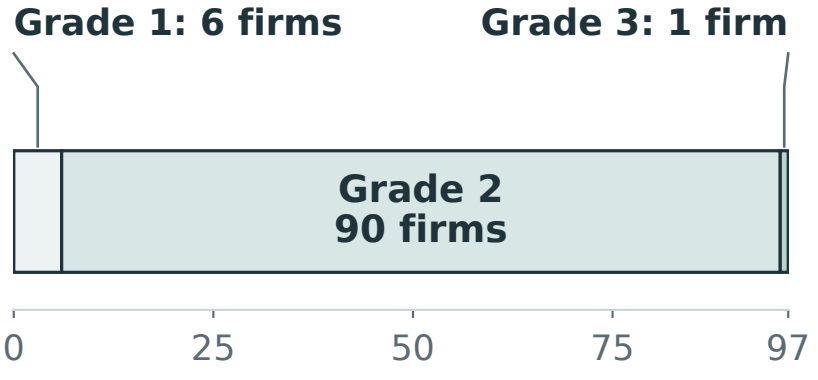
Two reconstructed common grade actions

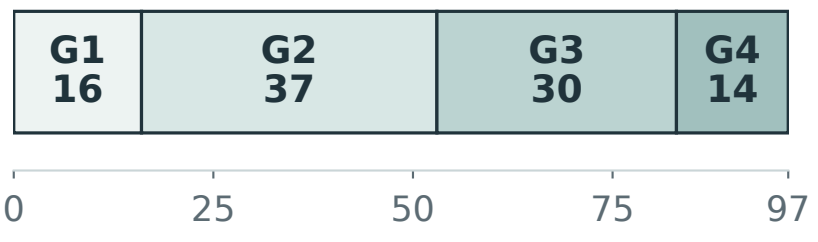
97 firms; equal race/gender weights. Signed-target coefficients; highest priority at left. Width = firm count.

τ = 1/4 (0.25); 3 of at most 4 grades



Disclosed pairs N / M	**636 / 4,656**
Disclosure N / M	**0.137**
Race wrong fraction	**0.196**
Gender wrong fraction	**0.237**
Risk at this row’s τ	**0.2455**

τ = 9/20 (0.45); 4 of at most 4 grades



Disclosed pairs N / M	**3,344 / 4,656**
Disclosure N / M	**0.718**
Race wrong fraction	**0.312**
Gender wrong fraction	**0.336**
Risk at this row’s τ	**0.3598**

Wrong fractions divide by disclosed pairs N. Risks use each row’s own withholding cost.

Historical coefficient convention.
Common actions are an analyst extension.
Different costs: no common-loss ranking, frontier or optimality certificate.
