Reproduce one declared figure

Public dependencies, scoped checks and a separate execution record.

Optional upstream scientific recomputation

Separate declared program
→ accepted saved results.
A separately requested operation.

Public plotting inputs

Declared finite fixture
or accepted results.
Keep source scope.

Plot program and shared style

Declared dependencies.
Bounded input checks
are explicit.

Desktop / mobile figure assets

SVG / PDF / PNG.
Retained originals keep
their identities.

Quarto source and HTML

Image, caption, alt text.
Render with scientific
execution disabled.

Separate checks accompany the route

Inputs: scope and exact values.
Assets: identities and actual figures.
HTML: captions, alt text, resources
and responsive display.

Separate audit evidence

Record commands, identities and views.
Private audit records are not required
scientific plotting inputs.

Solid arrows: public dependencies.
Dashed arrows: optional work or checks.
A historical receipt is not a new run.
No complete portfolio replay is asserted.
