(a) Count the same six pairs

Weighted distinct mass per pair

AB	AC	AD	BC	BD	CD
0	1/4	1	1/4	1	1

C,D > A,B N = 4, Q = 5/2

D > A,B,C N = 3, Q = 3

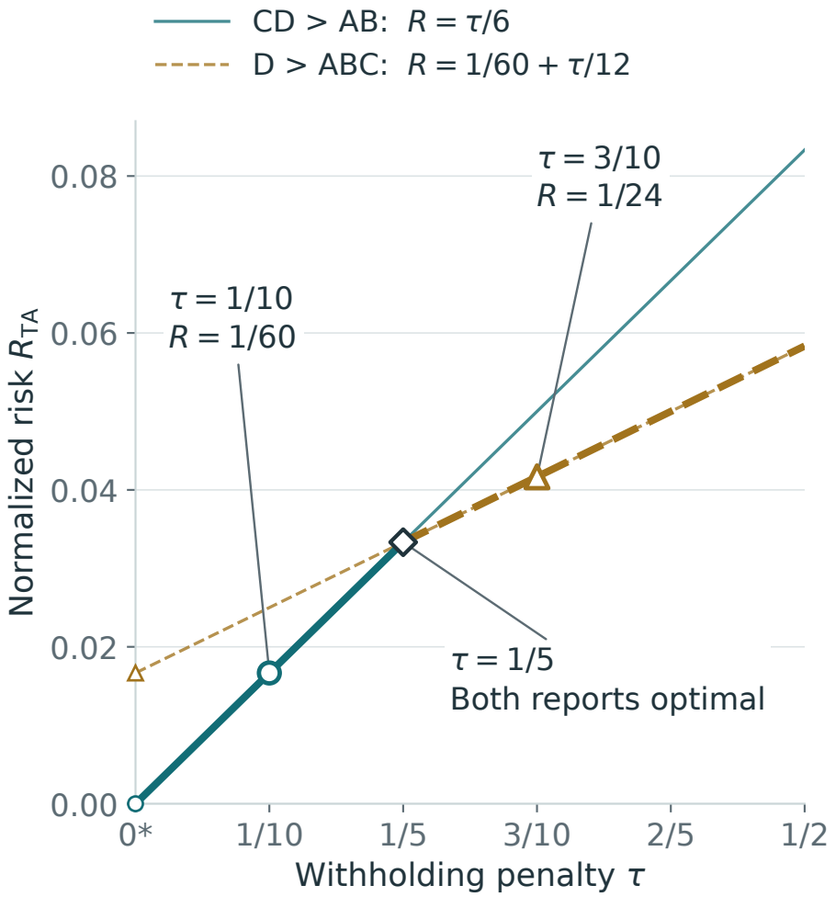
Lose AC and BC: mass 1/2.
Gain CD: mass 1.

✓ disclosed — withheld

Higher-priority grade first; commas join units in the same grade.

(b) Risk under the same family

Thick segments give minimum risk among all seven guarded reports.



* Zero is shown only as a limit.
Fixed law, weights and at-most-two-grade family; its maximum Q is 3, below T = 7/2.
