(a) Count the same six original pairs

Grades: higher first	Original pair	AB	AC	AD	BC	BD	CD
Weighted distinct mass		0	1/4	1	1/4	1	1
C,D > **A,B**		—	✓	✓	✓	✓	—
D > **A,B,C**		—	—	✓	—	✓	✓

N = 4
Q = 5/2

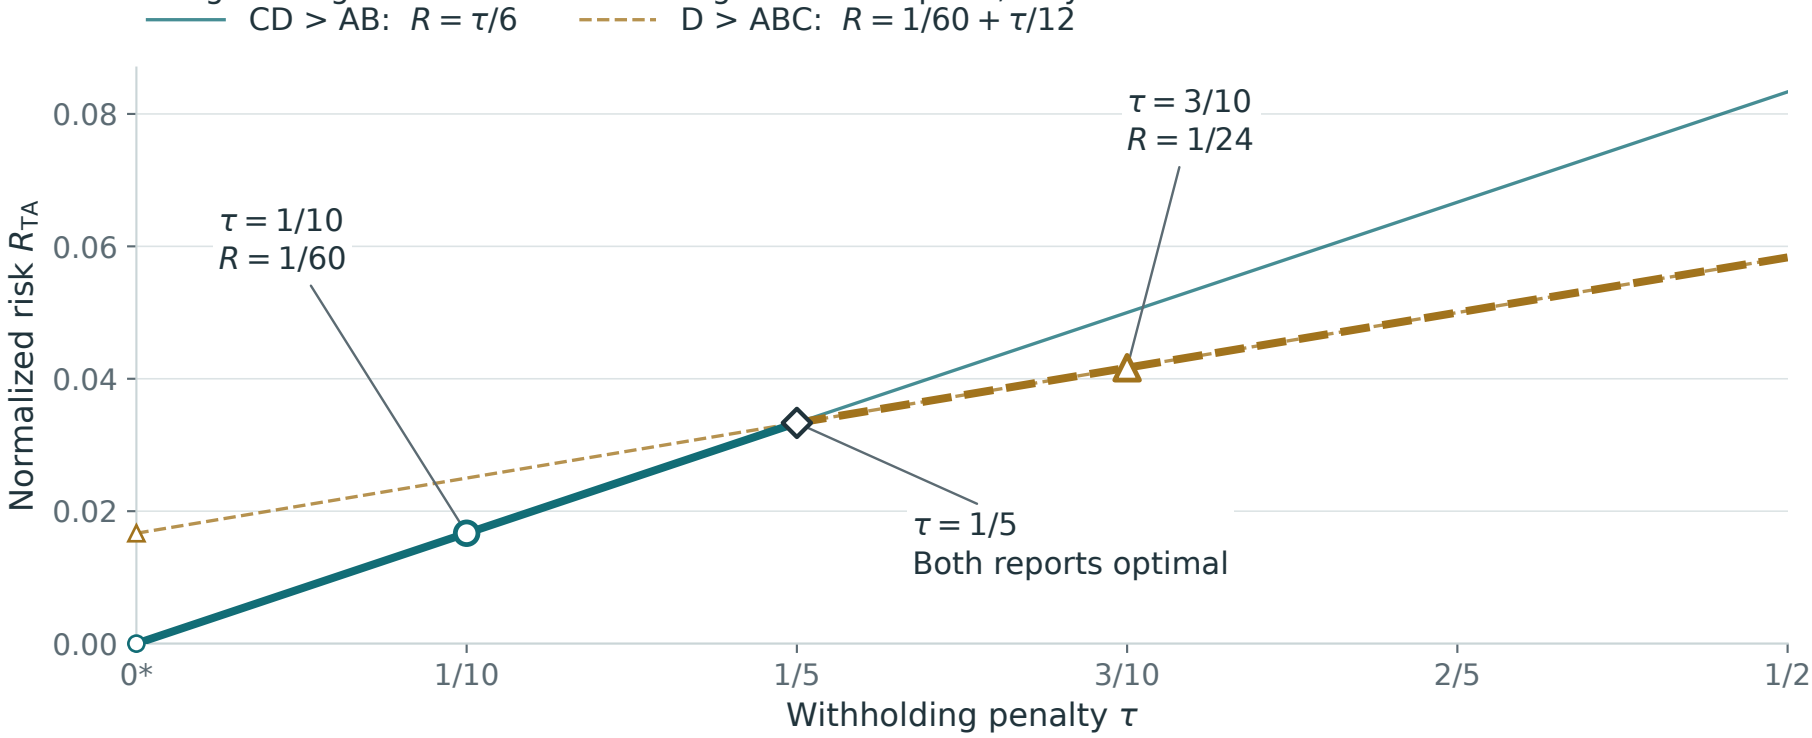
N = 3
Q = 3

✓ disclosed — withheld

Lose AC and BC (mass 1/2); gain CD (mass 1).

(b) Normalized risk under the same guarded at-most-two-grade family

Thick segments give minimum risk among all seven reports; only the two active candidates are drawn.



* Zero is shown only as a limit. The family has maximum Q = 3 < T = 7/2.
